DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I claims 1-12, 15-16, 22-23 in the reply filed on 17 July 2006 is acknowledged. The traversal is on the ground(s) that the search for all recognized independent and distinct inventions would not be considered to be a burdensome search since the inventions overlap based on the fluorinated aromatic structure. This is not found persuasive because the fluorinated aromatic structure maybe common in all three groups is not the controlling factor when searching the compound but the moieties attached to it. As disclosed in the previous office action, these moieties place the compounds in different classes; the searches would not overlap and would result in a burdensome search for the examiner.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 13-14, 17-20, 21 withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 17 July 2006.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1621

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 15-16 rejected under 35 U.S.C. 102(b) as being clearly anticipated by Rafferty et al. (US Pat. 5,736,568).

US'568 teaches the instant invention as shown in col. 18, compound XX wherein: L6 = Me, R1 = F, R2 = C-OAlk (carbonyl alkylloxy), R3 = R4 = H or F, m = 1-3, n = 0-1, A = B =absent.
